

2 Line and 3 Line Gas Tank Set Up

There are basically 2 ways to plumb your rc gas fuel tank. The 2 line or 3 line setup. It is a preference thing.

The diagrams are pretty well self explanatory and should provide all the information you need to get your tank properly set up.

2-line gasoline tank

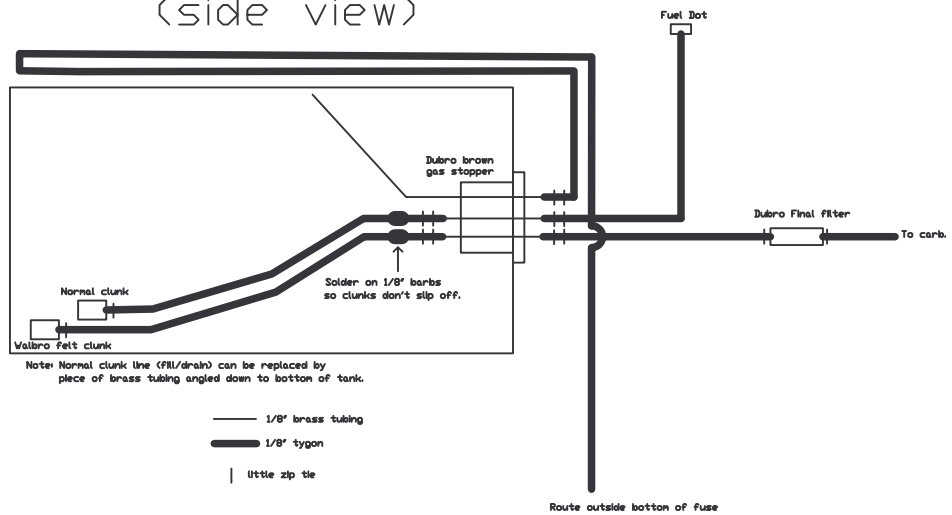

(side view)

— 1/8" brass tubing
 — 1/8" tygon
 | little zip tie

3-line gasoline tank, 2-clunk

(side view)

Note: Normal clunk line (fill/drain) can be replaced by piece of brass tubing angled down to bottom of tank.

— 1/8" brass tubing
 — 1/8" tygon
 | little zip tie
